

Environmental Policy

TEIDE REFRACTORY SOLUTIONS understands that its environmental policy is focused on continuous improvement through efficient production processes, which manage to minimize energy consumption, water consumption, emissions to the environment and waste, to protect health and safety at work as well as the natural environment.

It is considered essential to disseminate and communicate both to the company's internal staff, customers, suppliers and other interested parties that, in order to achieve and maintain this policy, it is based on the commitment to comply with the following points:

Comply with applicable regulations and legal requirements:

- Promote the training and awareness of our employees, suppliers and subcontractors regarding the environment.
- Take into account the development of good environmental practices.
- Protect the environment, in a sustainable way, making the correct use of resources and the correct management of waste, during our industrial activity.
- Reduce as far as possible the production of unnecessary emissions in the area of action, protecting the environment.
- Seek continuous improvement, by reviewing those aspects to improve and provide new solutions to environmental problems that can offer added value to society as a whole.
